Milestone 4 Brief Explanations

- A 3rd party wallet for fungible and non-fungible tokens is deployed and configured for tokens that will be utilized by the decentralized PROJECT FUTURE community at launch
  - The capability of the wallet to store fungible and non-fungible tokens is available. Demo videos of "WalletDemo1" and "WalletDemoAR" show this in detail.
- Wallet is set up for web 3 NFT community engagement without funding the wallets with fungible tokens
  - The wallet is functional and set up for web 3 NFTs. Demo videos of "WalletDemo1" and "WalletDemoAR" show this in detail.
- Vatom coordinates the integration of the wallet into the metaverse PROJECT FUTURE setup
  - The ability to have integration with the wallet into the metaverse is available. Demo video of "Spaces Demo" shows this in detail.
